

Sun Ray™ Server Software 4.0 Release Notes

for the Linux Operating System

Sun Microsystems, Inc.
www.sun.com

Part No. 820-0418-05
May 2007, Beta Release

Copyright 2002—2007, Sun Microsystems, Inc., 4150 Network Circle, Santa Clara, California 95054, U.S.A. All rights reserved.

Sun Microsystems, Inc. has intellectual property rights relating to technology embodied in the product that is described in this document. In particular, and without limitation, these intellectual property rights may include one or more of the U.S. patents listed at <http://www.sun.com/patents>, and one or more additional patents or pending patent applications in the U.S. and in other countries.

This document and the product to which it pertains are distributed under licenses restricting their use, copying, distribution, and decompilation. No part of the product or of this document may be reproduced in any form by any means without prior written authorization of Sun and its licensors, if any.

Third-party software, including font technology, is copyrighted and licensed from Sun suppliers.

Parts of the product may be derived from Berkeley BSD systems, licensed from the University of California. UNIX is a registered trademark in the U.S. and other countries, exclusively licensed through X/Open Company, Ltd.

Sun, Sun Microsystems, the Sun logo, Sun Ray, Sun WebServer, Sun Enterprise, Ultra, UltraSPARC, SunFastEthernet, Sun Quad FastEthernet, Java, JDK, HotJava, and Solaris are trademarks, registered trademarks, or service marks of Sun Microsystems, Inc. in the U.S. and other countries. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. in the U.S. and other countries. Products bearing SPARC trademarks are based upon an architecture developed by Sun Microsystems, Inc.

Netscape is a trademark or registered trademark of Netscape Communications Corporation.

The OPEN LOOK and Sun™ Graphical User Interface was developed by Sun Microsystems, Inc. for its users and licensees. Sun acknowledges the pioneering efforts of Xerox in researching and developing the concept of visual or graphical user interfaces for the computer industry. Sun holds a non-exclusive license from Xerox to the Xerox Graphical User Interface, which license also covers Sun's licensees who implement OPEN LOOK GUIs and otherwise comply with Sun's written license agreements.

Federal Acquisitions: Commercial Software—Government Users Subject to Standard License Terms and Conditions.

Use, duplication, or disclosure by the U.S. Government is subject to restrictions set forth in the Sun Microsystems, Inc. license agreements and as provided in DFARS 227.7202-1(a) and 227.7202-3(a) (1995), DFARS 252.227-7013(c)(1)(ii) (Oct. 1998), FAR 12.212(a) (1995), FAR 52.227-19, or FAR 52.227-14 (ALT III), as applicable.

DOCUMENTATION IS PROVIDED "AS IS" AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

Copyright 2002—2007, Sun Microsystems, Inc., 4150 Network Circle, Santa Clara, California 95054, Etats-Unis. Tous droits réservés.

Sun Microsystems, Inc. a les droits de propriété intellectuels relatifs à la technologie incorporée dans le produit qui est décrit dans ce document. En particulier, et sans la limitation, ces droits de propriété intellectuels peuvent inclure un ou plus des brevets américains énumérés à <http://www.sun.com/patents> et un ou les brevets plus supplémentaires ou les applications de brevet en attente dans les Etats-Unis et dans les autres pays.

Ce produit ou document est protégé par un copyright et distribué avec des licences qui en restreignent l'utilisation, la copie, la distribution, et la décompilation. Aucune partie de ce produit ou document ne peut être reproduite sous aucune forme, par quelque moyen que ce soit, sans l'autorisation préalable et écrite de Sun et de ses bailleurs de licence, s'il y ena.

Le logiciel détenu par des tiers, et qui comprend la technologie relative aux polices de caractères, est protégé par un copyright et licencié par des fournisseurs de Sun.

Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie. UNIX est une marque déposée aux Etats-Unis et dans d'autres pays et licenciée exclusivement par X/Open Company, Ltd.

Sun, Sun Microsystems, le logo Sun, Sun Ray, Sun WebServer, Sun Enterprise, Ultra, UltraSPARC, SunFastEthernet, Sun Quad FastEthernet, Java, JDK, HotJava, et Solaris sont des marques de fabrique ou des marques déposées, ou marques de service, de Sun Microsystems, Inc. aux Etats-Unis et dans d'autres pays.

Toutes les marques SPARC sont utilisées sous licence et sont des marques de fabrique ou des marques déposées de SPARC International, Inc. aux Etats-Unis et dans d'autres pays. Les produits portant les marques SPARC sont basés sur une architecture développée par Sun Microsystems, Inc.

Netscape est une marque de Netscape Communications Corporation aux Etats-Unis et dans d'autres pays.

L'interface d'utilisation graphique OPEN LOOK et Sun™ a été développée par Sun Microsystems, Inc. pour ses utilisateurs et licenciés. Sun reconnaît les efforts de pionniers de Xerox pour la recherche et le développement du concept des interfaces d'utilisation visuelle ou graphique pour l'industrie de l'informatique. Sun détient une licence non exclusive de Xerox sur l'interface d'utilisation graphique Xerox, cette licence couvrant également les licenciées de Sun qui mettent en place l'interface d'utilisation graphique OPEN LOOK et qui en outre se conforment aux licences écrites de Sun.

LA DOCUMENTATION EST FOURNIE "EN L'ETAT" ET TOUTES AUTRES CONDITIONS, DECLARATIONS ET GARANTIES EXPRESSES OU TACITES SONT FORMELLEMENT EXCLUES, DANS LA MESURE AUTORISEE PAR LA LOI APPLICABLE, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE A LA QUALITE MARCHANDE, A L'APTITUDE A UNE UTILISATION PARTICULIERE OU A L'ABSENCE DE CONTREFAÇON.

Contents

utselect and utwall	7

Sun Ray Server Software 4.0

Release Notes for Linux

Supported Platforms

This version of Sun Ray Server Software runs on the following versions of the Linux operating system:

- SuSE Linux Enterprise Server (SLES) 9 with Service Pack 3
(32-bit and 64-bit)
 - All packages are required and must be installed.
 - During installation, select Full Installation.
 - Be sure to install tftp.
- Red Hat Enterprise Linux Advanced Server (RHEL AS) 4 Update 3
(32-bit and 64-bit)
 - All packages are required and must be installed.

What's New

Sun Ray Server Software 4.0 for Linux offers the following new features:

New Admin GUI

The Sun Ray Administration Tool (Admin GUI) has been rewritten for the 4.0 release. It uses the Java Server Faces (JSF) technology to dynamically render a Web-based administration interface that complies with the most current Sun branding. The previously used CGI-based rendering logic has been completely removed.

New OSD

On Screen Display icons have been revised to present a clearer depiction of connectivity and other issues; however, the icon codes and DHCP codes remain the same. They are described in Tables B-1 and B-2 in the *Sun Ray Server Software 4.0 Administrator's Guide*.

Pop-up GUI

The Pop-up Graphical User Interface allows the entry of network configuration parameters for a Sun Ray DTU from the attached keyboard. It is described in Chapter 7 of the *Sun Ray Server Software 4.0 Administrator's Guide*.

Kiosk (Controlled Access) Mode

Kiosk Mode is now supported on Linux platforms. It is described in Chapter 10 of the *Sun Ray Server Software Administrator's Guide*.

Integrated VPN Support

Sun Ray Server Software with the most recent firmware provides a VPN solution for remote users that does not require a separate VPN router. This functionality is supported only on Sun Ray 2 hardware, such as the Sun Ray 2, Sun Ray 2FS, and Sun Ray 270 DTUs.

NAT Gateway Device Support

Peripheral devices are now supported when the Sun Ray DTU is behind a NAT gateway.

Known Problems and Workarounds

Keyboard Issues

Alt and Meta Keys

Alt and Meta keys are swapped when XKB is enabled.

XKB on RHEL

In RHEL, the following message is displayed after enabling XKB feature; however, the feature works as expected.

```
Error activating XKB configuration.  
Probably internal X server problem.
```

Numeric Keypad Mapping

In pre-1.5 releases of JRE, numeric keypad mapping does not work properly in Java-based Sun Ray tools such as `utsettings`, `utmhconfig`, and the registration GUI.

The workaround is to create a GUI-JRE link in `/etc/opt/SUNWut` to point to an appropriate JRE release and set the environment variable `_AWT_USE_TYPE4_PATCH` to false. For instance:

```
# ln -s <path_to_jre_1.5> guijre  
# setenv _AWT_USE_TYPE4_PATCH false
```

Keyboard Layout

`setxkbmap` cannot be used to set layouts for keyboards on Sun Ray DTUs.

Screen Issues

No Screen Lock for Second Linux Session

A user who creates two Linux sessions cannot create a screen lock for the second session. When SRSS needs to lock the screen, it uses `xlock` for the second session. When the user tries to lock the screen from the menu, nothing happens. The workaround is to start a screensaver daemon for the second session manually, to enable screen locking and stop SRSS from using `xlock`.

```
# /usr/X11R6/bin/xscreensaver -nosplash &
```

Mass Storage Issues

Caution – Failure to run `utdiskadm -r` before unplugging mass storage devices will cause loss of data. Make sure your users run `utdiskadm -r` before they unplug any mass storage device.

```
% /opt/SUNWut/bin/utdiskadm -r device_name
```

Restart of Sun Ray Services Required on RHEL

On RHEL, after reboot of the Sun Ray Server, Sun Ray Services must be restarted.

```
# /opt/SUNWut/sbin/utrestart -c
```

L10N Issues

L10N packages are not installed by default; however, they are included in the Supplemental directory and can be installed manually with the `rpm -i` command. The following packages are available:

TABLE 1 L10N Packages

Language	Package(s)
For French	SUNWfuta, SUNWfuto, SUNWfutwa, SUNWfutwh
For German	SUNWduto
For Italian	SUNWiuto
For Japanese	SUNWjuta, SUNWjuto, SUNWjutwa, SUNWjutwh
For Korean	SUNWkuto
For Portuguese	SUNWputo
For Simplified Chinese	SUNWcuta, SUNWcuto, SUNWcutwa, SUNWcutwh
For Spanish	SUNWeuto
For Traditional Chinese	SUNWhuto

- **For French, Japanese, Simplified Chinese locales, restart the Administration GUI after installing the Admin GUI locale packages:**

```
# /opt/SUNWut/lib/utwebadmin restart
```

- **To display the locale correctly in the Admin GUI, adapt your browser's language preferences, and select the desired locale (fr, ja, or zh_CN).**

For example, for Mozilla, go to Tools -> Options -> Advanced -> Edit Languages.

Admin GUI Logout

Admin GUI logout does not work in the French locale. The workaround is:

1. Remove the following line:

```
onClick="#{login.logoutMessage}"
```

from the logoutLink section of the

/opt/SUNWut/webadmin/webapps/ut/jsp/misc/Masthead.jsp file:

```
<f:facet name="logoutLink">
    <ui:hyperlink id="logout"
        action="#{login.logout}"
        immediate="true"
        onClick="#{login.logoutMessage}"
        toolTip="#{msg.masthead_logout_link_tooltip}"
        target="_top"/>
</f:facet>
```

2. Restart the Admin GUI:

```
# /opt/SUNWut/lib/utwebadmin restart
```

Online Help (French)

The following workaround enables the help text to display in the French locale, although left-pane navigation may continue to display in English.

1. Copy the files toc.xml and index.xml from the English online help location:

```
# cp /opt/SUNWut/webapps/ut/html/en/help/toc.xml \
/opt/SUNWut/webapps/ut/html/fr/help
# cp /opt/SUNWut/webapps/ut/html/en/help/index.xml \
/opt/SUNWut/webapps/ut/html/fr/help
```

2. Restart the Admin GUI:

```
# /opt/SUNWut/lib/utwebadmin restart
```

Multibyte Font Display Problem

In multibyte locales using pre-1.5 releases of JRE, Java-based Sun Ray tools such as `utsettings`, `utmhconfig`, and the Registration GUI do not work properly. Proper multibyte font display requires JRE 1.5.

The workaround is to create a `gui_jre` symbolic link in `/etc/opt/SUNWut` to point to an appropriate JRE release, for instance:

```
# ln -s </path_to_jre_1.5> gui_jre
```

The Registration GUI, `utsettings`, and `utmhconfig`, can then be launched with the specified JRE.

utselect and utwall

In the Simplified Chinese, Traditional Chinese, and Korean locales, `utselect` and `utwall` do not work properly in Linux distributions.

A workaround for this issue is to remove the `utselect` and `utwall` catalog files from the appropriate locale sub-directory. This brings up `utselect` and `utwall` in English.

For the Simplified Chinese locale:

```
# rm /opt/SUNWut/lib/locale/zh_CN/LC_MESSAGES/utselect.mo
# rm /opt/SUNWut/lib/locale/zh_CN/LC_MESSAGES/utwall.mo

# rm /opt/SUNWut/lib/locale/zh_CN.utf8/LC_MESSAGES/utselect.mo
# rm /opt/SUNWut/lib/locale/zh_CN.utf8/LC_MESSAGES/utwall.mo
```

For the Traditional Chinese locale:

```
# rm /opt/SUNWut/lib/locale/zh_TW/LC_MESSAGES/utselect.mo
# rm /opt/SUNWut/lib/locale/zh_TW/LC_MESSAGES/utwall.mo
```

For the Korean locale:

```
# rm /opt/SUNWut/lib/locale/ko_KR.utf8/LC_MESSAGES/utselect.mo
# rm /opt/SUNWut/lib/locale/ko_KR.utf8/LC_MESSAGES/utwall.mo
```
